x.com/enochkgm

First-year B.E. CSE (AI/ML) student interested in artificial intelligence, machine learning and software development. Currently strengthening programming fundamentals through Python, SQL and hands-on projects, including web applications and experimental programming-language development.

Skills:

Python • SQL • HTML5 • CSS

Libraries:

Numpy • Turtle

Tools:

VSCode • Git/Github

Education:

East Point College
of Engineering and Technology

Sep 2026 - Present • **BE CSE(AI/ML)**

CMR National PU
College -ITPL

March 2026 • **Class XII**

91.5%

Kids Global High School

April 2024 • **Class X**

87.2%

Projects:

LPL - Local Premier League Database-Based Website

Render • Git/Github • Supabase • AI Assisted Development

Developed and led the development of an end-to-end cricket league platform which included the player stats, fixtures, points table, match results, season history, and administration management features. Employed the use of AI coding assistance tools like Codex, Claude, and Cursor to implement the platform, while I personally managed GitHub integration, Supabase setup, deployment, and testing.
